NOTICE OF EXAMINATIONS

OF

MASTERS AND MATES OF "FOREIGN-GOING SHIPS,"

AND OF

"HOME-TRADE PASSENGER SHIPS,"

Established in pursuance of the Merchant Shipping Act, 1854,

AND OF

ENGINEERS UNDER THE MERCHANT SHIPPING ACT AMENDMENT ACT, 1862;

ALSO OF

VOLUNTARY EXAMINATIONS IN STEAM.

1. UNDER the provisions of the Merchant Shipping Act, 1854, no "Foreign-going Ship" * or "Home Trade Passenger Ship" * can obtain a clearance or transire, or legally proceed to sea, from any port in the United Kingdom unless the Master thereof, and in the case of a Foreign-going Ship the First and Second Mates or Only Mate (as the case may be), and in the case of a "Home Trade Passenger Ship" the First or Only Mate (as the case may be), have obtained and possess valid Certificates, either of Competency or Service, appropriate to their several stations in such ship, or of a higher grade; and no such ship, if of *one hundred tons burden or upwards*, can legally proceed to sea unless at *least one officer besides the Master* has obtained and possesses a valid Certificate, appropriate to the grade of Only Mate therein, or to a higher grade; and every person who, having been engaged to serve as Master or as First, or Second, or Only Mate of any "Foreign-going Ship," or as Master or First or Only Mate of a "Home Trade Passenger Ship," goes to sea as such Master or Mate without being at the time entitled to and possessed of such a Certificate as the Act requires, or who employs any person as Master or First, Second, or Only Mate of any "Foreign-going Ship," or as Master or First or Only Mate of any "Home Trade Passenger Ship," without ascertaining that he is at the time entitled to and possessed of such Certificate, *for each offence incurs a penalty not exceeding fifty pounds.*

2. Every Certificate of *Competency* for a "Foreign-going Ship" is to be deemed to be of a higher grade than the corresponding Certificate for a "Home Trade Passenger Ship," and entitles the lawful holder to go to sea in the corresponding grade in such last-mentioned Ship; but, *no Certificate for a "Home Trade Passenger Ship" entitles the holder to go to sea as Master or Mate of a "Foreign-going Ship."*

3. A Certificate of *Service* entitles an Officer, who had already served as either Master or Mate in a British Foreign-going Ship before the 1st of January, 1851, or as Master or Mate in a Home Trade Passenger Ship before the 1st of January, 1854, to serve in those capacities again; and it also entitles an Officer who has attained or attains the rank of Lieutenant, Master, Passed Mate, or Second Master, or any higher rank in the service of Her Majesty or of the late East India Company, to serve as Master of a British Merchant Ship, and may be had by application to the Registrar-General of Seamen, Adelaide Place, London Bridge, or to any Superintendent in the Outports, on the transmission and verification of the necessary certificates and testimonials.

4. *Certificates of Competency* will be granted to those persons who pass the requisite examinations, and otherwise comply with the requisite conditions. For this purpose Examiners have been appointed under the Local Marine Boards, and arrangements have been made for holding the examinations at the several ports upon the days specified against them; and these days are so arranged for general convenience, that a candidate wishing to proceed to sea, and missing the day at his own port, may proceed to another port where an examination is coming forward. The days for commencing the examinations at the various ports are set forth in pages 6 to 9 of this work.

5. Applicants for examination must give their names to the Superintendent, or to the Local Marine Board at the place where they intend to be examined, on or before the day of examination, and must conform to any regulations in this respect which may be laid down by the Local Marine Board; and if this be not done, delay may be occasioned.

6. Testimonials of character, and of sobriety, experience, ability, and good conduct on board ship, will be required of all applicants, and without producing them no person will be examined. As such testimonials may have to be forwarded to the office of the Registrar-General of Seamen

* By a "Foreign-going Ship" is meant one which is bound to some place out of the United Kingdom, beyond the limits included between the river Elbe and Brest; and by a "Home Trade Passenger Ship" is meant any Home Trade Ship employed in carrying passengers; and it is to be observed that *Foreign Steam Ships when employed in carrying passengers between Places in the United Kingdom* are subject to all the Provisions of the Act, as regards certificates of Masters and Mates, to which British Steam Ships are subject (s. 291).

in London for verification before any certificates can be granted, it is desirable that candidates should lodge them as early as possible. Testimonials of servitude on board Foreign Vessels, before being received by the Examiners, are to be confirmed either by the endorsement of the Consul of the Country to which the ship belongs, or by some other recognised official authority of that Country, or by the testimony of some credible person on the spot having personal knowledge of the facts required to be established. Upon application to the Superintendent, candidates will be supplied with a form (Exn. 2), which they will be required to fill up and lodge with their testimonials in the hands of the Examiners.

7. The examinations will commence early in the forenoon on the days before mentioned, and be continued from day to day until all the candidates whose names appear upon the Superintendent's list on the day of examination are examined.

8. The qualifications required for the several ranks under-mentioned, are as follow. (N.B. Where the Local Marine Board are in every respect satisfied with the testimonials of a candidate, service in the Coasting Trade may be allowed to count as service in order to qualify him for examination for a Certificate of Competency for Foreign-going Ships as a Mate; and two years' service as Mate in the Coasting Trade may be allowed to count as service for a Master's Certificate, provided the candidate's name has been entered as Mate on the Coasting Articles, and provided he has already passed an examination.)

A SECOND MATE must be seventeen years of age, and must have been four years at sea.

In NAVIGATION.—He must write a legible hand, and understand the first five rules of arithmetic and the use of logarithms. He must be able to work a day's work complete, including the bearings and distance of the port he is bound to, by Mercator's method; to correct the sun's declination for longitude, and find his latitude by meridian altitude of the sun; and work such other easy problems of a like nature, as may be put to him. He must understand the use of the sextant, and be able to observe with it, and read off the arc.

In SEAMANSHIP.— He must give satisfactory answers as to the rigging and unrigging of ships, stowing of holds, &c.; must understand the measurement of the log-line, glass, and lead-line; be conversant with the rule of the road, as regards both steamers and sailing vessels, and the lights and fog signals carried by them.

AN ONLY MATE must be nineteen years of age, and have been five years at sea.

In NAVIGATION.—In addition to the qualification required for a Second Mate, an Only Mate must be able to observe and calculate the amplitude of the sun, and reduce the variation of the compass therefrom, and be able to find the longitude by chronometer by the usual methods. He must know how to lay off the place of the ship on the chart, both by bearings of known objects, and by latitude and longitude. He must be able to determine the error of a sextant and adjust it, and find the time of high water from the known time at full and change.

In SEAMANSHIP.—In addition to what is required by a Second Mate, he must know how to moor and unmoor, and to keep a clear anchor; to carry out an anchor; to take a hold, and make the requisite entries in the ship's log. He will also be questioned as to his knowledge of the use and management of the mortar and rocket lines in the case of the stranding of a vessel, as explained in the official Log-Book.

A FIRST MATE must be nineteen years of age, and have served five years at sea, of which one year must have been as either Second or Only Mate, or as both.*

In NAVIGATION.—In addition to the qualification required for an Only Mate, he must be able to observe azimuths and compute the variation; to compare chronometers and keep their rates, and find the longitude by them from an observation by the sun; to work the latitude by single altitude of the sun off the meridian; and be able to use and adjust the sextant by the sun.

In SEAMANSHIP.—In addition to the qualification necessary for an Only Mate, a more extensive knowledge of seamanship will be required, as to shifting large spars and sails, managing a ship in stormy weather, taking in and making sail, shifting yards and masts, &c., and getting heavy weights, anchors, &c., in and out; casting a ship on a lee-shore; and to secure the masts in the event of accident to the bowsprit.

A MASTER must be twenty-one years of age, and have been six years at sea, of which one year must have been as First or Only Mate, and one year as Second Mate; or two years as First and Only Mate.*

In addition to the qualification for a First Mate, he must be able to find the latitude by a star, &c. He will be asked questions as to the nature of the attraction of the ship's iron upon the compass, and as to the method of determining it. He will be examined in so much of the Laws of the Tides as is necessary to enable him to shape a course, and to compare his soundings with the depths marked on the charts. He will be examined as to his competency to construct rafts, and as to his resources for the preservation of the ship's crew in the event of wreck. He must possess a knowledge of what he is required to do by law; as to entry and discharge, and the management of his crew; and as to penalties and entries to be made in the official log. He will be questioned as to his knowledge of invoices, charterparty, Lloyd's agent, and as to the nature of bottomry; and he must be acquainted with the leading lights of the channel he has been accustomed to navigate, or which he is going to use.

In cases where an applicant for a certificate as Master Ordinary has only served in a fore and aft rigged vessel, and is ignorant of the management of a square rigged vessel, he may obtain a certificate on which the words "*fore and aft rigged vessel*" will be written. This certificate does not entitle him to command a square rigged ship. This is not, however, to apply to Mates, who, being younger men, are expected for the future to learn their business completely.

AN EXTRA MASTER'S EXAMINATION is voluntary, and intended for such persons as wish to prove their superior qualifications.

In NAVIGATION.—As the vessels which such Masters will command frequently make long voyages, to the East Indies, and the Pacific, &c., the candidates will be required to work a lunar observation by both sun and star, to determine the latitude by the moon and star, by Polar star off the meridian, and also by double altitude of the sun, and to verify the result by Sumner's method. He must be able to calculate the altitudes of the sun or star when they cannot be observed, for the

* Service in a superior capacity is in all cases to be equivalent to service in an inferior capacity.

purposes of lunars, also to find the error of a watch by the method of equal altitudes, to correct the altitudes observed with an artificial horizon.

He must understand how to observe and apply the deviation of the compass; and to deduce the set and rate of the current from the D.R. and observation. He will be required to explain the nature of great circle sailing, and know how to apply practically that knowledge, but he will not be required to go into the calculations. He must be acquainted with the law of storms, so far as to know how he may probably best escape those tempests common to the East and West Indies, and known as hurricanes.

In SEAMANSHIP.—The extra Examination will consist of an inquiry into the competency of the party to heave a ship down, in case of accident befalling her abroad; of getting lower masts in and out; and to perform such other operations of a like nature as the Examiner may consider necessary.

QUALIFICATIONS FOR CERTIFICATES OF COMPETENCY FOR "HOME TRADE PASSENGER SHIPS."

A MATE must write a legible hand, and understand the first four rules of arithmetic. He must know and understand the rule of the road, and describe and show that he understands the Admiralty regulations as to lights. He must be able to take a bearing by compass, and prick off the ship's course on a chart. He must know the marks in the lead-line, and be able to work and heave the log.

A MASTER must have served one year as a Mate in the Foreign or Home Trade. In addition to the qualifications required for a Mate, he must show that he is capable of navigating a ship along any coast, for which purpose he will be required to draw upon a chart produced by the Examiner the courses and distances he would run along shore from headland to headland, and to give in writing the courses and distances corrected for variation, and the bearings of the headlands and lights, as well as to show when the course should be altered, either to clear any dangers or to adapt it to the coast. He must understand how to make his soundings according to the state of the tide. He will also be questioned as to his knowledge of the use and management of the mortar and rocket lines in the case of the stranding of a vessel, as explained in the official Log-Book.

A first-class Pilot may be examined for a Master's Certificate of competency for Home Trade Passenger Ships, notwithstanding that he may not have served in the capacity of Mate.

General Rules as to Examinations and Fees.

9. The candidates will be allowed to work out the various problems according to the method and the tables they have been accustomed to use, and will be allowed five hours to perform the work; at the expiration of which, if they have not finished, they will be declared to have failed, unless the Local Marine Board see fit to extend the time.

Fees to be paid by Applicants for Examination.

10. The fee for examination must be paid to the Superintendent. If a candidate fail in his examination, half the fee he has paid will be returned to him by the Superintendent on his producing a document which will be given him by the Examiner. The fees are as follow :—

FOR "FOREIGN-GOING SHIPS."

	£	s.	d.
Second Mate	1	0	0
First and Only Mate, if previously possessing an inferior Certificate .	0	10	0
If not	1	0	0
Master, whether Extra or Ordinary	2	0	0
Master, if previously in possession of a Certificate "For fore and aft rigged vessels" . . .	1	0	0

FOR "HOME TRADE PASSENGER SHIPS."

	£	s.	d.
Mate	0	10	0
Master	1	0	0

11. Any one who is in possession of a Master's Certificate of competency for a Foreign-going ship, may pass an extra Examination without payment of any fee; but if he fails in his first Examination, half a Master's fee will be charged for every subsequent attempt.

12. If the applicant passes he will receive the Form (Exn. 16) from the Examiner, which will entitle him to receive his Certificate of Competency from the Superintendent at the port to which he has directed it to be forwarded. If his testimonials have been sent to the Registrar-General of Seamen to be verified, they will be returned with his Certificate.

13. If an applicant is examined for a higher rank and fails, but passes an Examination of a lower grade, he may receive a Certificate accordingly, but no part of the fee will be returned.

14. In all cases of failure the candidate must be re-examined *de novo*, and in case of failure in *Seamanship* a candidate will not be examined *until after a lapse of* SIX MONTHS, to give him time to gain experience.

15. As the Examinations of Masters and Mates are made compulsory, the qualifications have been kept as low as possible; but it must be distinctly understood that it is the intention of the Board of Trade to raise the standard from time to time, whenever, as will no doubt be the case, the general attainments of officers in the Merchant Service shall render it possible to do so without inconvenience; and Officers are strongly urged to employ their leisure hours, when in port, in the acquirement of the knowledge necessary to enable them to pass their examinations; and Masters will do well to permit Apprentices and junior Officers to attend schools of instruction, and to afford them as much time for this purpose as possible.

EXAMINATIONS IN STEAM.

16. Arrangements have been made for giving to those Masters, and First or Only Mates, who possess Certificates of Competency (or applicants for such Certificates) who desire to do so, an opportunity of undergoing an examination as to their practical knowledge of the use and working of the steam engine.

17. These examinations are conducted under the superintendence of the Local Marine Boards, at such times as they may appoint for the purpose; and the Examiners are selected by the Board of Trade, from the engineer surveyors appointed under the fourth part of the Merchant Shipping Act, 1854.

18. Any such person desiring to be so examined must hand in to the Superintendent a statement in writing to that effect on a Schedule (Exn. 2). If he is already possessed of a Certificate of Competency, he must deliver this statement with his certificate to the Superintendent, at such time as the Local Marine Board may appoint for the purpose.

19. A fee of one pound must be paid; but if he fails, no part of the fee will be returned. If he passes, the report (Exn. 14) will be sent to the Board of Trade, and the Certificate of Competency with the form (Exn. 2) to the Registrar-General of Seamen; the words "Passed in Steam," with the date and place of examination, will then be entered on the Certificate and its counterpart, and the Certificate will be sent to the Superintendent of the port named in the application (Exn. 2), to be delivered to the applicant in the usual manner.

The examination is *viva voce*, and extends to a general knowledge of the practical use and working of the steam engine, and of the various valves, fittings, and pieces of machinery connected with it. Intricate theoretical questions in calculations of horse power, or areas of cylinders and valves, or any of the more difficult questions which appertain to steam engines and boilers, will not be asked. The examination will, in fact, be confined to what a Master of a steam vessel may be called upon to perform in the case of the death, incapacity, or delinquency of the engineer.

If the applicant fails to answer some few of the questions, and yet, in the opinion of the Examiner, possesses such a competent knowledge of the parts of the engine generally, and such other practical knowledge of the subject as will enable him to effect the object in view, the Examiner will exercise his discretion as to whether a sufficiently high standard of knowledge has been attained, and pass him or not accordingly.

The Examiners will provide such drawings and working sections, on a sufficiently large scale, of the various parts of the steam-engine, and of the valves and slides, &c., as may be necessary, and will require the applicant to make use of them in giving his answers to the various questions put to him; and, if an opportunity offer, the applicant will be permitted, under the guidance of the Examiner, to start and stop the engine of some vessel which may have her steam up.

QUESTIONS

TO BE ANSWERED BY APPLICANTS UNDER EXAMINATION IN THE PRACTICAL USE OF THE STEAM ENGINE.

Explain the nature and use of the principal valves and cocks connected with the boilers and engines, commencing with the boilers.

Boiler Valves and Cocks.

1. Safety valves.
2. Reverse or atmospheric valves.
3. Communication or stop valves.
4. Feed valves.
5. Kingston valves.
6. Blow-off cocks.
7. Communication cocks.
8. The water gauge cocks.
9. The glass water gauge.
10. Steam gauge.
11. Hand-pump for boilers.

Engine Valves and Cocks.

1. Throttle valves.
2. The slide valves.
3. The expansion valves.
4. The escape valves on top and bottom of cylinder.
5. The blow-through valves.
6. The foot valve.
7. The delivering valve.
8. The air-pump bucket valves.
9. The injection valves and cocks.
10. Bilge-pump valves and cocks.
11. Stop or sluice valves to discharge pipes.
12. Jacket cocks.
13. The sniffling valves.

Boilers.

1. If the safety valves were set fast, how would you relieve the pressure on the boilers, if steam was up and could not make its escape?

2. How do you ascertain the saltness of the water in the boiler?

3. How would you manage to change the water in the boiler, if the blow-off cocks were set fast?

4. On examining the boilers, and they are found to be thin, what measures would you adopt to prevent accidents?

5. How would you keep the boilers free from salt and incrustation?

6. Is it requisite to have a hand-pump fitted to the boilers? if so, for what purpose?

7. Explain the use of the gauge-glasses and gauge-cocks, fitted on the boilers.

8. If the mercury was blown out of the steam-gauge by the pressure of steam in the boilers, what would you apprehend was the cause?

9. What would you do to relieve the pressure of the boilers?

10. How would you regulate the height or quantity of water in the boilers?

11. When the steam is up, how is the feed applied to the boilers?

12. When it is not up, what is necessary to be done before the fires are lighted?

13. When the engines are stopped, what precautions are necessary with regard to the water in the boiler?

Digitized by Google

14. What is meant by a boiler priming?
15. How would you prevent it doing so?
16. If the water in a boiler is suffered to get too low, what may be the consequences?
17. What height should the water stand in a common boiler above the flues?
18. What height should the water stand in a tubular boiler above the tubes?
19. If any of the tubes were damaged by the fire, or leaky, what would you do, supposing you could not shift them?
20. How do you detect the pressure of steam in a boiler?
21. If the water in a boiler is suffered to get too high, what might be the consequences?
22. How would you know when the water in the boiler requires changing?
23. Explain the use of the thermometer and hydrometer.

Engines.

24. Explain the use of the cylinders.
25. Explain the use of the air pump.
26. Explain the use of the condenser.
27. Explain the use of the eduction pipe.
28. Explain the use of the hot-water cistern.
29. Explain the use of the piston, and how fitted.
30. Explain the use of the stuffing-box and glands.
31. Explain the use of the parallel-motion rods.
32. Explain the use of the excentric, and how fitted.
33. Explain the use of the starting-lever.
34. Explain the use of the barometer.
35. Explain the use of the steam-gauge.
36. The vessel is alongside the wharf, proceed to get the steam up.
37. When the steam is up, how is it applied to the engine to set it in motion?
38. What precaution is necessary before the engine is set in motion?
39. How do you start the engine?
40. Is it necessary to move the engines by hand a turn or two before starting?
41. The engines being started, regulate the injection-cocks, so as to keep them going at full or reduced speed.
42. What is the use of the injection?
43. How is the vacuum maintained in a condensing engine?
44. How do you know when there is too much injection?
45. How do you know when there is not enough injection?
46. If the injection was not shut off when the engines are stopped, what would happen?
47. If the condenser reject the injection, what would you do?
48. Would it be advantageous if an injection-pipe was fitted so as to take injection from the bilge, if required.
49. If water should get into the cylinder, what might be the consequence?
50. In running free with a heavy sea and a jump upon the engines, what precautions would you take to endeavour to prevent damage to the engines?
51. If one engine be damaged, what would you do in order to proceed?
52. If the excentric should break, could the engines still be worked?
53. If a bearing becomes heated, what would you do?
54. How would you slow an engine?
55. How would you stop an engine?
56. Wherein does a high-pressure differ from a low-pressure engine?
57. How do you admit tallow into the cylinders, when the engines are at work, for the purpose of lubricating the pistons?
58. What is meant by working the engines expansively?
59. How would you disconnect the engines if there was no disconnecting gear fitted?
60. What is meant by throwing the engines out of gear?
61. Why have two feed-pumps fitted, say one to each engine?
62. Is it requisite to have branch pipes fitted to the feed-pumps? if so, for what purpose?

EXAMINATIONS OF ENGINEERS FOR CERTIFICATES OF COMPETENCY,

Under the Merchant Shipping Acts, &c. Amendment Act, 1862.

Under the provisions of the "Merchant Shipping Acts, &c., Amendment Act, 1862," no "Foreign-going Steam Ship," or "Home Trade Passenger Steam Ship," can obtain a clearance or transire, or legally proceed to sea, from any port in the United Kingdom, unless in the case of a Foreign-going Steam Ship of 100 nominal horse-power or upwards, the First and Second Engineers, and in the case of a Foreign-going Steam Ship of less than 100 nominal horse-power, or a Home Trade Passenger Steam Ship, the First or Only Engineer (as the case may be), have obtained and possess valid Certificates either of competency or service appropriate to their several stations in such Steam Ship, or of a higher grade.

Every person who, having been engaged to serve as First or Second Engineer in a Foreign-going Steam Ship of 100 nominal horse-power and upwards, or as First or Only Engineer in a Foreign-going Steam Ship of less than 100 nominal horse-power, or in a Home Trade Passenger Steam Ship, goes to sea, as such First, Second, or Only Engineer, without being at the time entitled to and possessed of such a Certificate as the Act requires, or who employs any person as First or Second Engineer in a Foreign-going Steam Ship of 100 nominal horse-power and upwards, or as First or Only Engineer in a Foreign-going Steam Ship of less than 100 nominal horse-power, or a Home Trade Passenger Steam Ship, without ascertaining that he is at the time entitled to and possessed of such Certificate, for each offence incurs a penalty not exceeding fifty pounds.

The Certificates of Engineers are of two descriptions, viz., Certificates of Competency, and Certificates of Service; and for each description of Certificate there are two grades, viz., "First-class Engineer's Certificates," and "Second-class Engineer's Certificates."

Certificates of Competency will be granted to those persons who pass the requisite examinations, and otherwise comply with the requisite conditions. For this purpose Examiners have been appointed by the Board of Trade, and arrangements have been made for holding the examinations in the places and at the times named

Digitized by Google

in pages 6 to 9. The Examiners are selected generally from the Engineer Surveyors of the port; but no Engineer Surveyor is to undertake the duty unless he receives special instructions from the Board of Trade.

The application for examination is to be made on Form Exn. 3. The same Rules are to be observed by Engineers in making application to be examined, in paying the fees, and in forwarding testimonials, as in the case of applications by Masters and Mates. See above, *para.* 4 and 5.

QUALIFICATIONS FOR CERTIFICATES OF COMPETENCY.

SECOND CLASS ENGINEER.—A candidate for a Second-class Engineer's Certificate must be 21 years of age:

(*a.*) He must have served an apprenticeship to an Engineer, or prove that for not less than three years he has been employed in some factory or workshop on the making or repairing of engines; and must also have served one year at sea in the Engine Room; or

(*b.*) He must have served at least four years at sea in the Engine Room.

(*c.*) He must be able to give a description of boilers, and the methods of staying them, together with the use and management of the different valves, cocks, pipes, and connexions.

(*d.*) He must understand how to correct defects from accident, decay, &c., and the means of repairing such defects.

(*e.*) He must understand the use of the barometer, thermometer, hydrometer, and salinometer.

(*f.*) He must state the causes, effects, and usual remedies for incrustation and corrosion.

(*g.*) He must be able to state how a temporary or permanent repair could be effected in case of derangement of a part of the machinery, or total break down.

(*h.*) He must write a legible hand, and understand the first five rules of arithmetic and decimals.

(*i.*) He must be able to pass a creditable examination as to the various constructions of paddle and screw engines, in general use; as to the details of the different working parts external and internal, with the use of each part.

FIRST CLASS ENGINEER.—A candidate for a First-class Engineer's Certificate must be 22 years of age.

In addition to the qualification required for a Second-class Engineer,

(*a.*) He must either possess or be entitled to a First-class Engineer's Certificate of Service; or in the event of his not being so possessed or entitled he must have served for one year with a Second-class Engineer's Certificate of competency.

(*b.*) He must be able to make rough working drawings of the different parts of the engines and boilers.

(*c.*) He must also be able to take off and calculate indicator diagrams.

(*d.*) He must be able to calculate safety-valve pressures, and the strength of the boiler.

(*e.*) He must be able to state the general proportions borne by the principal parts of the machinery to each other.

(*f.*) He must be able to explain the method of testing and altering the setting of the slide valves, and of testing the fairness of the paddle and screw shafts and of adjusting them.

(*g.*) He must be conversant with surface condensation, superheating, and the working of steam expansively.

(*h.*) His knowledge of arithmetic must include the mensuration of superficies and solids and the extraction of the square root.

AN EXTRA FIRST CLASS ENGINEER'S EXAMINATION is voluntary, and is intended for such persons as wish to prove their superior qualifications, and are desirous of having certificates for the highest grade granted by the Board of Trade.

The candidate must be entitled to or possessed of a First Class Engineer's Certificate of competency, and in addition to the qualifications required for a First Class Engineer:

(*a.*) He must possess a thorough knowledge of the construction and working of marine engines and boilers in all their parts, and be so far acquainted with the elements of theoretical mechanics as to comprehend the general principles on which the machine works.

(*b.*) He must understand how to apply the indicator and draw the proper conclusions from the diagrams.

(*c.*) He must be acquainted with the principles of expansion, and able to prove, or at least to illustrate, the use of the expansion gear.

(*d.*) He must be able to draw rough sketches of any part of the machinery, with figured dimensions, fit to work from.

GENERAL RULES AS TO EXAMINATIONS AND FEES.

The examination will be partly *vivâ voce*, and partly by examination papers. It will be directed specially to the above points, and to the duties and business of an Engineer generally.

If the candidate passes the *vivâ-voce* examination creditably, a set of questions will be given to work out.

He will be allowed to work out these questions according to the methods he is accustomed to use, and will be allowed five hours to perform the work; at the expiration of which time, if he has not finished he will be declared to have failed, unless the Local Marine Board see fit to extend the time.

A report of the Examination, and the Examination Papers, will be forwarded to the Board of Trade on the Form (Exn. 15).

The fee for examination must be paid to the Superintendent of the Mercantile Marine Office. If a candidate fail in his examination, half the fee he has paid will be returned to him by the Superintendent on his

producing the form Exn. 17, which will be given him by the Examiner. The fees are as follow :—

	£	s.	d.
First-class Engineer's Certificate . .	2	0	0
Second-class Engineer's Certificate .	1	0	0
For First-class Engineer's Certificate, if already in possession of a Second-class Certificate	1	0	0

If the applicant passes he will receive a Form Exn. 16 from the Examiner, which will entitle him to receive his Certificate of Competency from the Superintendent of the Mercantile Marine Office at the port to which he has directed it to be forwarded. If his testimonials have been sent to the Registrar to be verified, they will be returned with his Certificate.

If an applicant is examined for the higher grade, and fails, but passes an examination of the lower grade, he may receive a Certificate accordingly, but no part of the fee will be returned.

If the applicant fails in working out the examination papers, he may present himself for re-examination whenever he thinks he has acquired sufficient knowledge to enable him to pass. But if he fails in the *viva voce*, or practical part of the examination, he may not present himself for re-examination until the expiration of three months from the date of failure.

CERTIFICATES OF SERVICE.

Every person who, before the 1st April, 1862, had served as First Engineer in a British Foreign-going Steam Ship of 100 nominal horse-power and upwards, or who has attained or attains the rank of Engineer in the service of Her Majesty or of the East India Company, is entitled to a First-class Engineer's Certificate of Service; and every person who, before the above-mentioned date, has served as Second Engineer in any Foreign-going Steam Ship of 100 nominal horse-power or upwards, or as First or Only Engineer in any other Steam Ship, or who has attained or attains the rank of First-class Assistant Engineer in the service of Her Majesty, is entitled to a Second-class Engineer's Certificate of Service.

Application for Certificates of Service must be made on the printed Form Exn. 22, to be obtained *free of charge* of the Registrar-General of Seamen, Adelaide Place, London Bridge, London, or of the Superintendent of any Mercantile Marine Office.

Note.—A person possessing a Master's Certificate, whether of competency or service, is eligible to command any vessel of whatsoever tonnage, and either certificate is sufficient for clearance at the Custom House, unless the conditions of the Charterparty of vessels taken up by Government for the conveyance of troops, stores, or emigrants, and also the Regulations of the principal Steam Packet Companies, require that the Master and principal officers shall possess Certificates of competency.

The First Mate may engage as Mate of any kind.

The Only Mate as Mate when there is no other; or as Second Mate when there is a First Mate.

The Second Mate is not appropriate for any superior station, and must be employed only in cases where a First Mate is also engaged.

A Certificate of Competency for a Foreign-going ship is equivalent to a Certificate of equal or lower grade for a Home-trade Passenger Ship, and entitles the holder to fill the situation of Master or Mate, as the case may be.

Certificates of Competency or Service may be either of a grade appropriate to the Stations held for the time being, or of any superior grade.
